&

Call for Papers

Deadline extended to February 15th 2006

International Conference Vienna October 2006

ALL ABOUT KARST & WATER

Decision Making in a Sensitive Environment

Background

In many European countries karstic areas are important and acutely essential for public water supply. These areas are at the same time highly sensitive and valuable natural environments. Conversely, exploitation pressure on these areas is increasing. This mainly relates to such fields as tourism, settlements, transport infrastructure, forestry and pasture management. Due to the fact that competing land-use activities cause heterogeneously distributed consequences, unplanned disparities can appear.

Competing land-use activities pose challenges for water resource management. This task must be based on a sound knowledge of the environment and of land-use interaction processes. Geographical Information Systems and environmental models provide the technological basis for the development and use of Decision Support Systems for efficient and transparent water resource management.

These activities have to be implemented strictly within the conditions of the European Water Framework Directive and shall provide input for the practice of water management, a discussion basis for experts and the basis for information and participation of the broad public.

KATER II

KATER II is a project within the framework of the INTERREG IIIB CADSES programme and is supported by Means of the European Regional Development Funds (ERDF).

Principally, the project KATER II aims at safeguarding water supply and the required natural conditions of the catchment areas. The conflicts between often incompatible land-use activities by necessity lead to effects of high relevance for regional planning.

The project is related to many measures of the INTERREG IIIB CADSES programme and with the installation of a Decision Support System aims to manage the conflicts between land-use activities and the natural environment. This indicates strong linkages with complementary planning strategies, as shaping the rural development, protecting the natural heritage, protecting and developing the landscape, promoting risk management and disaster prevention as well as promoting integrated water management and the prevention of floods.

The results of KATER II project (and its predecessor KATER) will be shared, discussed and complemented with new views for these topics of worldwide importance in the setting of an international conference.

Conference

ALL ABOUT KARST & WATER

takes place

from October 9th to 11th 2006 at Vienna City Hall, Austria.

The conference provides:

- presentations of scientific papers
- presentations of applied projects and user experiences
- company and product presentations
- interdisciplinary discussions
- excursions

Conference language is English.

Participation fee

	for registration and payment	
	until May 31 st 2006	after May 31 st 2006
Regular Participants	€ 200,- incl. 20% VAT	€ 250,- incl. 20% VAT
Students up to 27 years (with valid student ID)	€ 100,- incl. 20% VAT	€ 125,- incl. 20% VAT

The fee includes participation, proceedings, coffee-breaks and the gala dinner (October 9th 2006).

Registration

Online Registration starts at February 20th 2006 at **www.kater2006.at**.

To be permanently informed about the latest facts regarding the conference we would appreciate to set your name on the mailing list. Therefore please contact **office@kater2006.at**.

International Conference Vienna October 2006

ALL ABOUT KARST & WATER

Decision Making in a Sensitive Environment

Call for Papers

The Call for Papers is extended until **February 15th 2006**.

There are three categories of presentations:

- Scientific papers
- Applied projects and user experiences
- Poster presentations

Please send your abstracts of about 800 words (200 for posters) in English language until February 15th 2006 to **papers@kater2006.at**.

All abstracts will pass through a reviewing process. The reviewing team comprises the members of the Scientific Committee.

The time for the oral presentation is 20 minutes plus discussion.

The technical equipment of the presentation platform covers all current facilities (overhead, beamer etc.).

Commercial presentation

There are different possibilities of commercial presentations:

- Exhibition
- Product presentation
- Sponsoring

Exhibition

The exhibition offers a professional platform for the presentation of your company or institution. Stands are available in 6, 12 and 20 sqm size.

For detailed information demand the exhibition-folder at **office@kater2006.at**.

Product presentation

The Conference offers to companies the possibility of oral product presentation. The time for a product presentation is 10 minutes.

Please send short abstracts in English language until May 15th 2006 to **papers@kater2006.at**.

All abstracts will pass through a shortened reviewing process.

Sponsoring

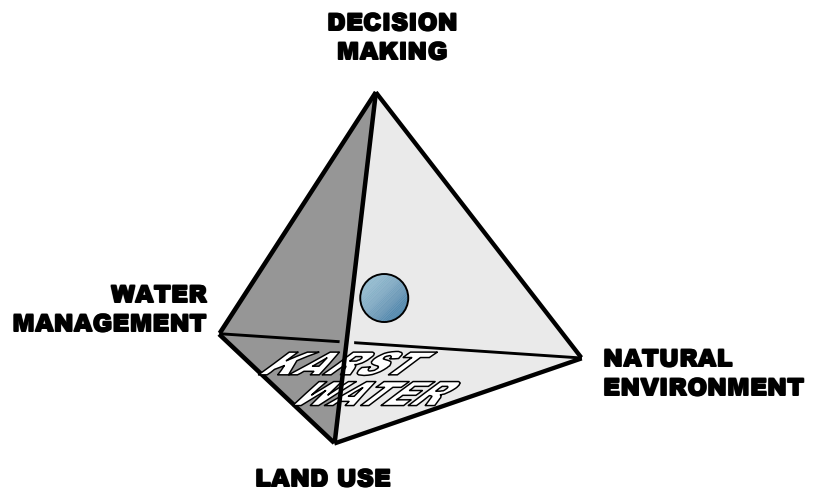

You want to share the group of donors - we offer several possibilities for sponsoring the conference.

- General Sponsor
- Sponsor
- Sponsor of Coffee Break

For detailed information demand the sponsoring-folder at **office@kater2006.at**. This folder includes also several possibilities for advertisement during the conference.

Objective

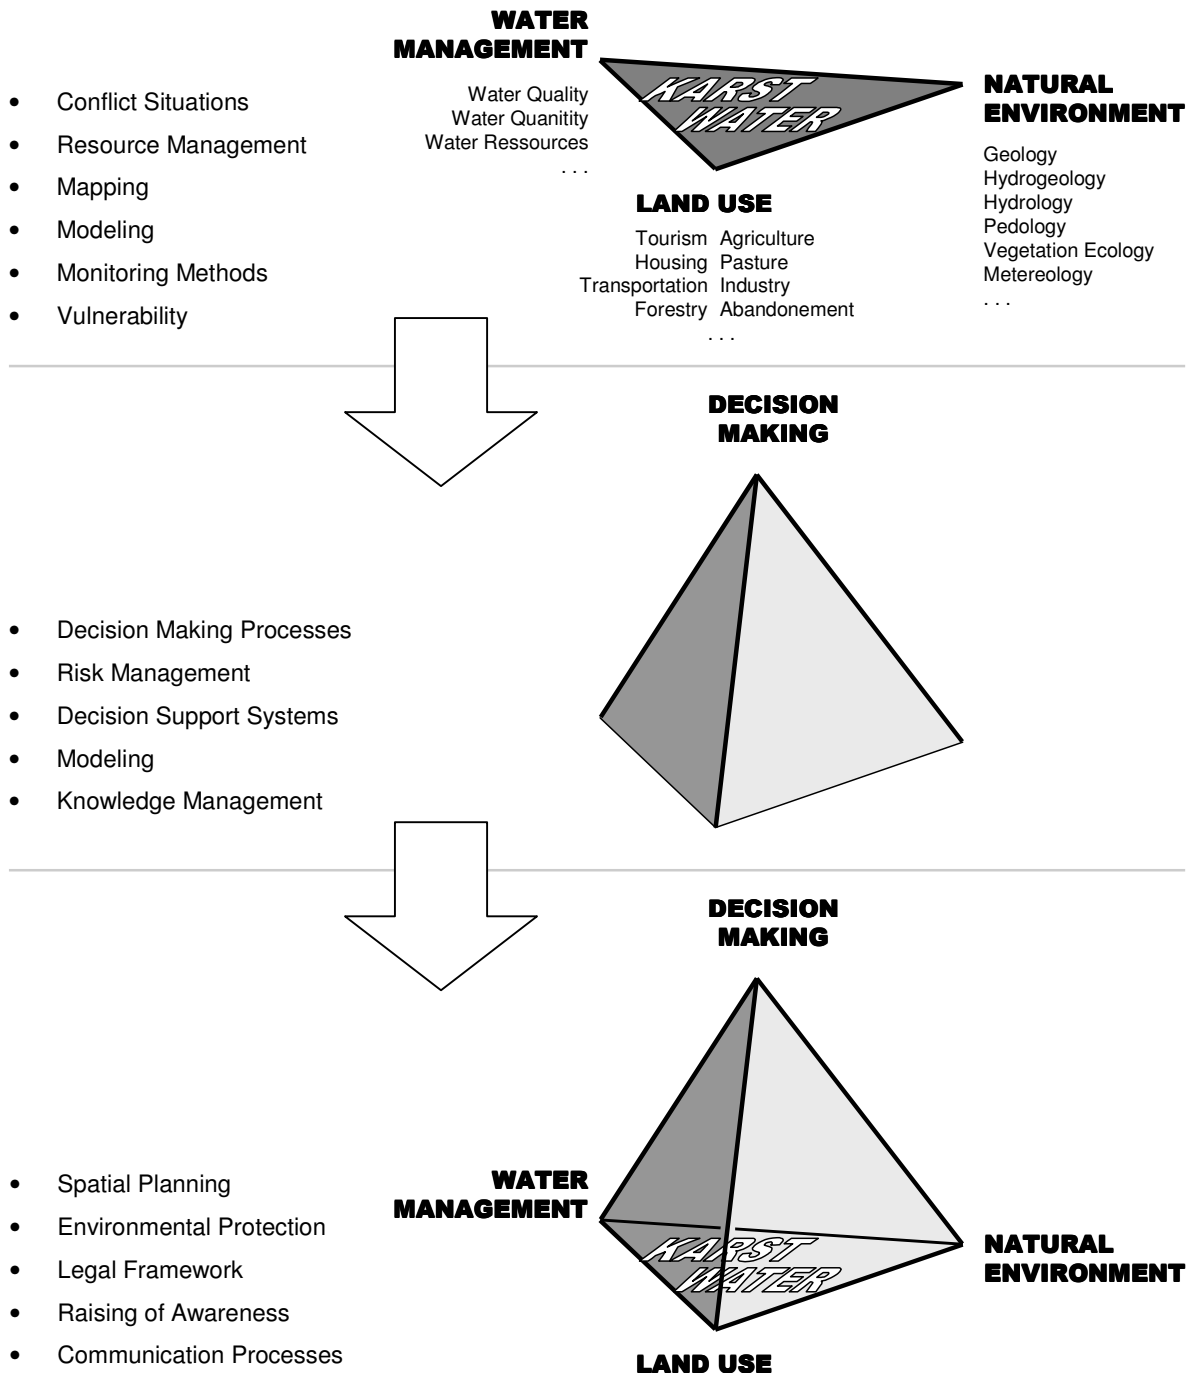

The intention of the conference is an interdisciplinary exchange of experiences as well as raising awareness regarding decision making in the conflict area of land use, natural environment and water management in karstic regions.

Topics

The conference is focussing on the main topics outlined here.

International Conference Vienna October 2006

ALL ABOUT KARST & WATER

Decision Making in a Sensitive Environment

Scientific Committee

Head **Ass. Prof. Barbara Čenčur Curk**
IRGO, Slovenia

Members **Prof. Božidar Biondić**
University of Zagreb, Croatia

Prof. Fulvio Celico
University of Molise, Italy

Prof. Massimo Civita
Polytechnic of Turin, Italy

Prof. Franco Cucchi
University of Trieste, Italy

Prof. Ivan Marušič
University of Ljubljana, Slovenia

Ass. Prof. Nenad Mikulič
Ministry of Environment, Croatia

Prof. Andreas Muhar
University of Applied Life Sciences, Austria

Prof. Gino Naclerio
University of Molise, Italy

Prof. Franco Posocco
University of Padova, Italy

Prof. Josef Strobl
University of Salzburg, Austria

Prof. Miran Veselič
University of Ljubljana, Slovenia

Prof. Hans Zojer
Joanneum Research - University of Graz, Austria

**Organization
Committee**

Head

Walter Kling

- IAWD International Association of Water Supply Companies in the Danube River Catchment Area
- IWA International Water Association
- Vienna Waterworks, Austria

Members

Marina Aurighi

- Regione Veneto, Italy

Carlo Carlomagno

- Environmental Protection Agency of Molise, Italy

Giuseppe Giuliano

- IRSA-CNR National Research Council, Water Research Institute, Italy

Brigitta Jamnik

- Ljubljana Water Utility, Slovenia

Grega Juvan

- IRGO, Slovenia

Franz Maier

- Austrian Environmental Umbrella Association

Slobodan Miko

- Croatian Geological Survey

Manfred Schrenk

- CORP Competence Center of Urban and Regional Planning
- IsoCaRP International Society of City and Regional Planners
- OGR Austrian Society of Regional Planners
- AGEO Austrian Umbrella Association for geographic Information
